# Alpha 225 LED

Alpha 225 LED is a full beam auxiliary LED light which exceeds the Xenon performances with an outstanding visibility through a perfect combination of width, range and volume. This light increases extraordinarily your vehicle lighting performances thanks to its specific high powered LED module which delivers an incredible light power through its class leading broad beam reflector.

## Dimensions

Dimension unit in mm (10<sup>th</sup> inch)

## Light Patterns

Broad off road

## Specifications

Bulb	33 LED - 8 500 Lm
Color Temperature	5700 °K
Light pattern	Broad Off Road beam ECE homologated Pilot Light LED
Consumption	150W for driving beam LED 2,3W for pilot Light LED
Voltage	multi voltage 10 - 33V
Intensity	6,25 Amp @ 24 Vdc for driving beam 0,1 Amp @ 24 Vdc for pilot light
Operating Temp	-40°C to +65°C
Polarity	protected against reverse voltage
Weight	2,8 Kg
Water Tightness	IP 67
Salt Spray	ISO 9227 - 240h
Housing	die cast aluminum
Lens	hard coated PC lens, clear protective cover included
Reflector	free form metallized reflector

## Connection

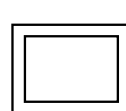

Built-in  
DT 3 ways

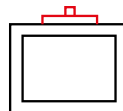

DT 3 ways harness included

## Mounting

Pedestal

Suspended

No tool adjustment

M10 stainless steel  
fasteners included
