

LED AUX - Ref. D16077

If you're looking for top-quality lighting for your ON and OFF-road vehicle, our 7" driving light is exactly what you need! Our LED auxiliary light has a lot of advantages:

- With a power of **108W**, our headlamp offers two powerful lighting modes: R149 lighting for on-road driving and a super bright mode for off-road driving.
- Our auxiliary round light is made from high-quality materials, including an aluminum housing, polycarbonate lens and stainless steel mounting brackets. What's more, our product is **CE, IP68, R149 approved**.
- Our driving light features a bare-wire cable for universal installation.
- Our compact LED long range light measures just 7 inches diameter, making it easy to install on your all terrain vehicle, 4x4 or truck.

To sum up, our auxiliary light is a high-quality lighting solution for off-road vehicle drivers looking to improve their visibility in the darkest environments. With exceptional power, superior build quality, operating versatility, easy installation and compact size, our headlight is the ideal choice for demanding drivers.
